

City of Magnolia
Disaster Recovery Generator Improvements
Round I, Phase II
OE Job No. 587.023 BC/BD

Scope of Work

The Base Bid of the City of Magnolia Disaster Recovery Generator Improvements – Round I, Phase II project consists of installing four (4) 35 kW standby diesel generators and one (1) 60 kW standby diesel generator unit at five (5) locations in Magnolia, Texas. Each of the five (5) generator installations are to include a weatherproof enclosure, automatic transfer switch, concrete slab, wiring, conduit, controls, and all related appurtenances for a fully operational system. Additive Alternate Bid A of this project consists of installing one (1) 35 kW standby diesel generator on a pre-engineered generator platform with a weatherproof enclosure, automatic transfer switch, concrete foundation, wiring, conduit, controls, and all related appurtenances for a fully operation system. Please see the Project Location Map in the plans for the location of each of the generator installations.
